WITH few exceptions THE STANLEY WORKS' products are made of wrought steel. We operate our own steel mills, insuring in our goods the steel best adapted to meet the requirements of each particular product.

The quality of our service has proved so satisfactory during seventy years of "knowing how" that we have been forced to erect the largest manufacturing plant in the world producing wrought hardware, to take care of our customers' demands.

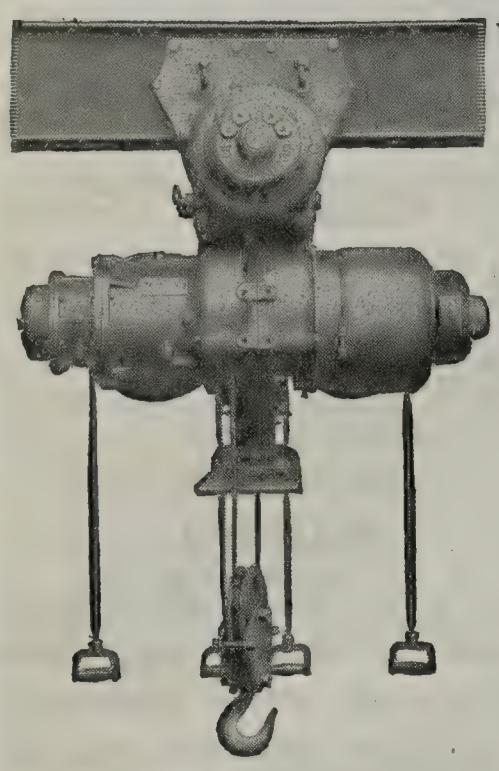
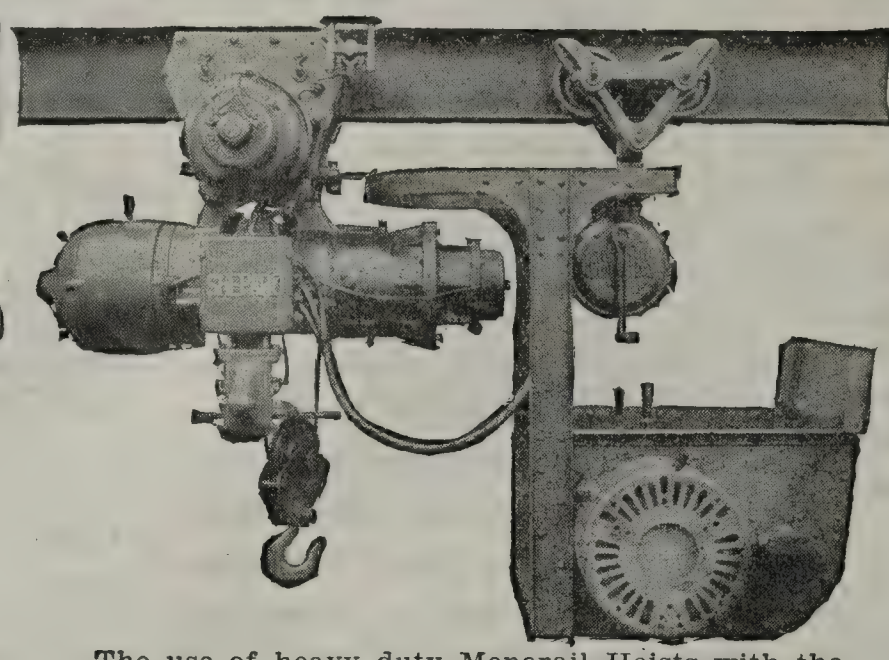
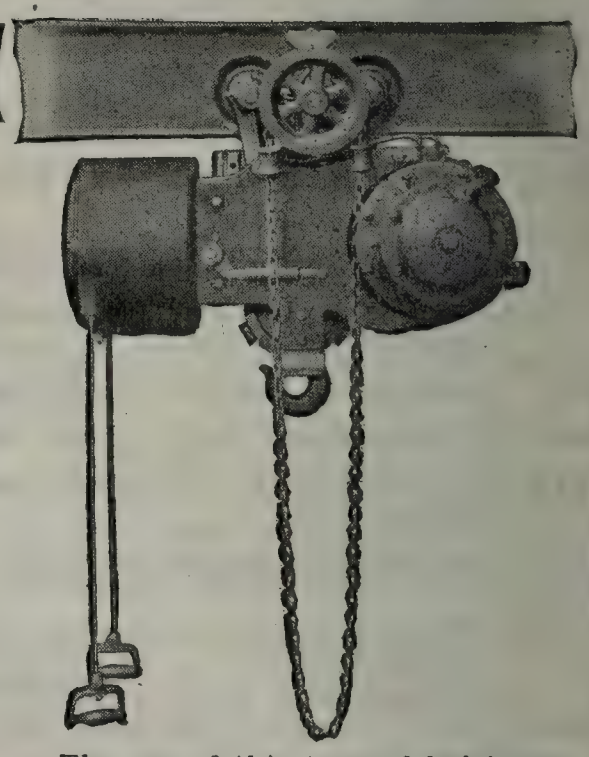
THE SHEPARD LINE IS COMPLETE



Foundry Control, D. C. Hoist with Motor Driven Trolley. Especially useful where loads must be carried distances too long for the workmen to push them on the runway efficiently.



The use of heavy duty Monorail Hoists with the flexibility of handling arrangements which transfer switches permits, revolutionizes handling methods in many industries. Can be enclosed for outdoor service.



The use of this type of hoist permits hoist service in low headroom where sufficient lift could not be otherwise obtained.

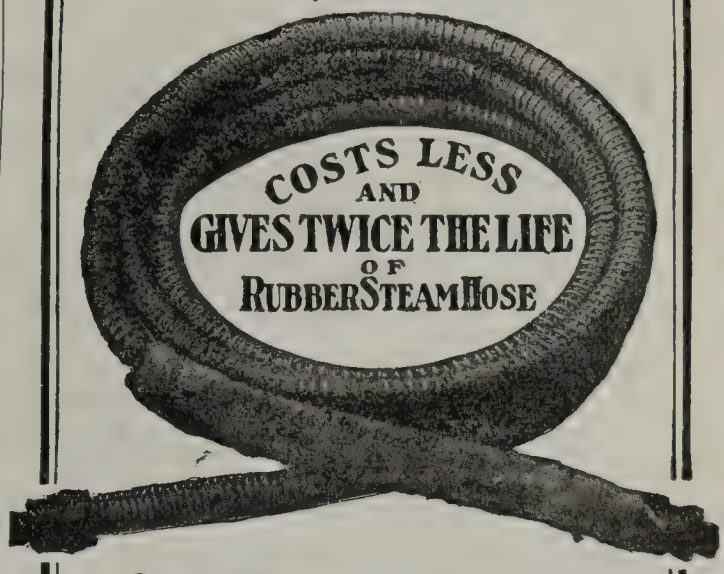
Strong's Flexible Metallic Hose

The main point of all business speakers to-day is "Efficiency." **Strong's Flexible Metal Hose (Interlocking Contour) is "EFFICIENCY"**—compared by every essential point required to test the word, **"EFFICIENCY."**



Cost Nominal— Service Phenomenal

For safety, economy, efficiency and service, use Strong's Flexible Metal (interlocking contour) Hose. This hose is made of bronze completely covered with braided armour wire, this reinforced with half round steel wire, its entire length, making a hose that is practically indestructible.

This hose will resist any and all temperatures and pressures and it is so flexible that a hundred foot length may be easily turned into an 18-inch coil. Write for prices and discounts.

Titeflex

REG. U. S. PAT. OFF

Titeflex All-Metal Hose flexes within the metal itself, and has a soft pliability not obtainable in any other form of metal hose. The joints being cold-welded *will not wear or leak* as will hose having ordinary packed and sliding joints. For handling fluid chemicals, gases, joints, etc. Titeflex is the longest lived hose that money can buy.

Steam and Air Hose—for power plant service, testing and operation of tools. Capacity up to 2000 lb. per sq. in.

Gasolene Hose—for storage and supply stations.

Full and Semi-Interlocked Metal Tubing—with or without asbestos or rubber packing.

HYDRAULIC JACKS

Watson-Stillman Hydraulic Jacks have stood the test for over 60 years, and have more than held their own against the many that have tried to compete. This in itself is sufficient proof of their superiority.

We build over 450 sizes and types, inside and outside pump type, high and low lift, small and large tonnage, and jacks for special purposes.

DUFF GENUINE BARRETT JACKS

You will find us listed herein as makers of practically every type of **Lifting Jack** in existence. We are the sole makers of the genuine "Barrett" jacks for all purposes, as well as the Duff Ball Bearing Screw Jacks and the Duff-Bethlehem Forged Steel Hydraulic Jacks. The Duff factory is the largest in existence devoted **exclusively** to the building of jacks. Our products have stood pre-eminent for 35 years, being early adopted as **the Standard** by the railroads and industrial world.

UNIVERSAL JOINTS

"GIANTS"

Giant universal joints are specially adapted for use in the driving mechanism of powerful, high-speed machines. They run efficiently up to 45 degrees angle, with wearing contacts of hardened steel of large diameters.

Self-oiling and entirely enclosed against dirt, Giants take care of themselves.

Made in 1 1/16; 1¼; 1⅝; 1¾, 2⅛ and 2½-in. sizes.

BALL

Ball joints are extremely flexible and may be run up to 70 degrees angle.

Made entirely of steel with balls hardened or of bronze or other metal.

The thousands in satisfactory use on all kinds of machines is a sufficient guaranty of their excellence.

Made in ¾; 1; 1¼; 1½; 1¾ and 2-in. sizes.

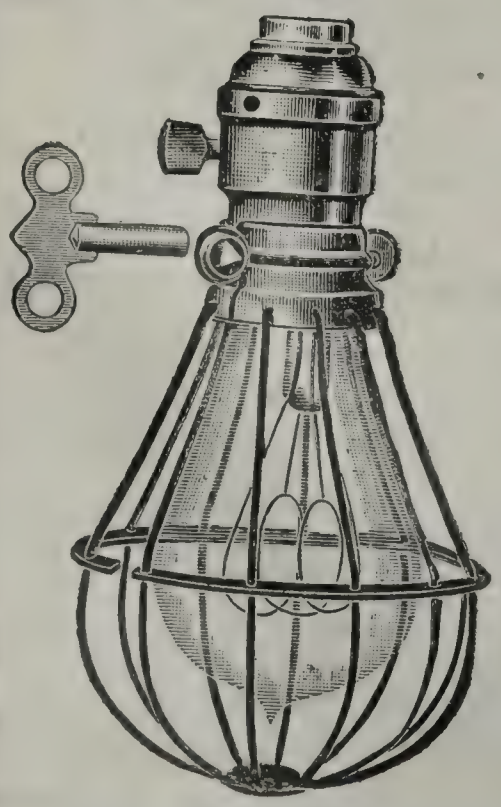
LOXON
LAMP GUARD
THE KEY TO SAFETY



CUT DOWN YOUR LAMP BILLS

THOUSANDS of factories, mills and shops cut down their bills for incandescent lamps by using **LOXONS.** They lock on with a key and absolutely **Prevent Theft and Breakage of Lamp,** as well as **Fire** from a hot or broken lamp next oily waste or other combustibles.

A **LOXON** costs no more than a lamp and saves many. So they pay big dividends.

The NATIONAL PORTABLE LAMP GUARD

Loxon Lamp Guards are made to fit all lamps from 15 Watt up to and including 200 Watt size. A free sample Loxon 25, 40 or 60 Watt size will be sent on request if you will write on your business letter head.

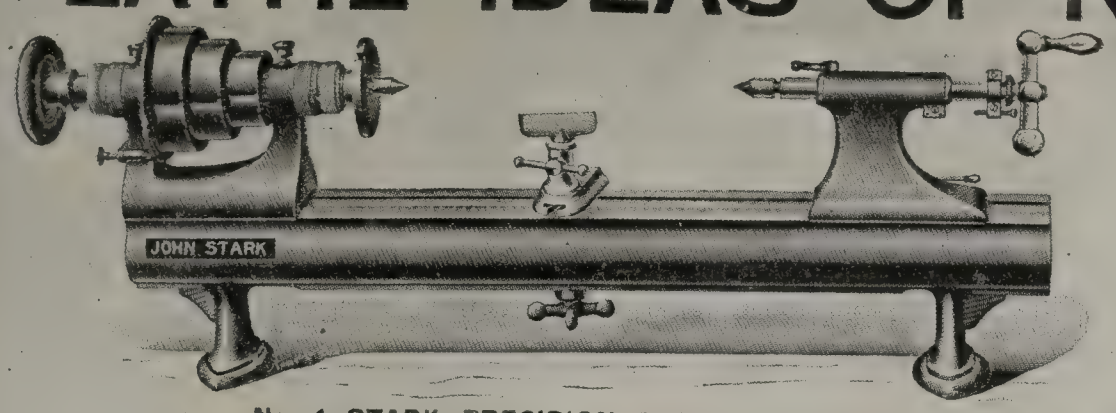
LATHE IDEAS OF NOWADAY



No. 4 STARK PRECISION BENCH LATHE.

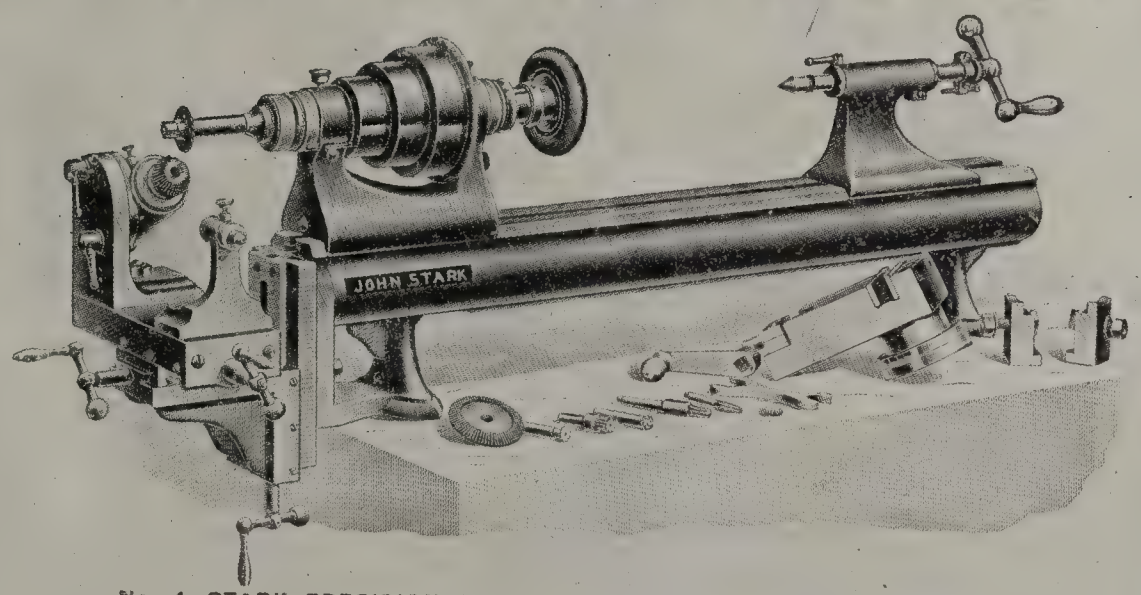
Length of bed 38", distance between centers 20". Lathe swings 9" and chuck capacity for stock from 1-64" to ¼" clear through. Equipped with Stark Patent Anti-Friction Draw-in Spindle and Anti-Fricton Ball Bearing End Thrust, which takes the strain off the bearings and does away with the back geared arrangement.

The Spindles and bearings are made of steel, hardened and ground to perfection, having angles of 3 degrees and 45 degrees. This principle is of great importance and is one of the essential features of the Stark Bench Lathes.

ECONOMY IN THE WORKSHOP

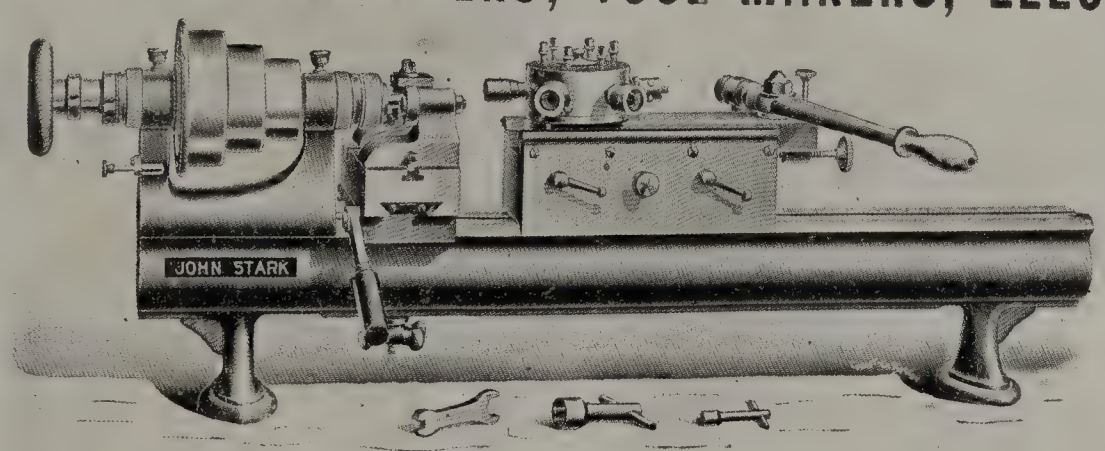
The Milling Attachment, is bolted to the angle iron which is cast with the bed, making it rigid and capable of accomplishing a large range of work. It has a lengthwise feed of 6", in and out feed 2½" and up and down 4¼", with distance between centers 6". The height from bed to center is 3⅞". This attachment takes the same chucks as are used in the lathe head.

We have demonstrated to the trade that spindles made with the taper bearings are more durable, last longer, and give better satisfaction than spindles made upon other principles.



No. 4 STARK PRECISION BENCH LATHE AND MILLING ATTACHMENT.

FOR ENGINEERS, TOOL MAKERS, ELECTRICIANS, ETC.



No. 4. STARK PRECISION BENCH LATHE WITH AUTOMATIC TURRET HEAD AND CUTTING-OFF AND FORMING REST.

The Automatic Turret Head has six ⅝" port holes to receive mills, drills, taps and dies, built strong and rigid, all the bearings and port holes are bushed with hardened steel, taking the place of a screw machine.

The cutting off and forming is suited for a variety of irregular formed pieces. The cutters are turned to the forms required, and only have to be ground on the face when sharpened.

No. 4 Wire Chuck, Capacity of chuck ¼"

FIVE YEARS AHEAD OF THEM ALL.

The nose of the spindle has a thread cut 10 pitch, which is hardened and ground to a perfect standard to receive Universal Chucks, and also a supporter for step chucks. This gives a greater advantage when using the Universal chuck as the work may pass clear through the spindle.

HYDRAULIC MACHINERY

We are equipped to handle orders for hydraulic machinery in all its many branches—valves, pumps, accumulators, presses, benders, shears, shaft straighteners, etc.

Our large line, over 5000 complete machines, probably offers a standard model that will meet your requirements. If not, our experience of nearly 70 years building hydraulic machinery is yours for the asking.

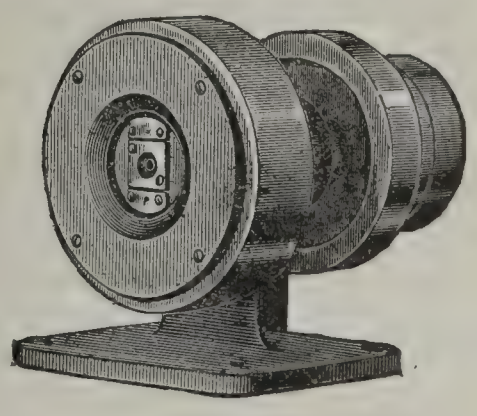
Swaging Strengthens Metal



You *know* that hammering, the oldest metal reduction method, is still the best. In the Dayton Swaging Machine the principle of the hammer is brought to the height of development.

The Dayton kneads and squeezes the metal by subjecting it to 2000 to 6000 blows a minute. It toughens, hardens and solidifies metal. And, unlike heat and abrasive treatments, it never results in any loss.

Write for our free literature.

9502 Machinists & Founders

Star (*) indicates Machinists.
Dagger (†) indicates Founders.
Star & Dagger (*†) indicates Machinists & Founders.
Section Mark (§) indicates Brass and Composition Founders.

All Manufacturers of Machinery, Castings, etc., who have a machine shop or foundry are classified under this heading and sub-classified in other parts of the book under the specific article they produce, such as:

Agricultural Implement Manufacturers.
Brick Machinery, Etc.
Cars, Various Kinds.
Cast Iron Pipe, Various Kinds.
Castings, Various Kinds.
Cranes, Various Kinds.
Drills, Various Kinds.
Dynamos & Motors.
Elevators.
Engines, Various Kinds.
Flour Mill Machinery.
Gears, Various Kinds.
Grinders, Various Kinds.
Hammers, Various Kinds.
Harrows, sub-classification of Agricultural Implements.
Heaters, Steam & Hot Water.
Ice & Refrigerating Machinery.
Lathes, Various Kinds.
Mining Machinery.
Paper & Pulp Mill Machinery.
Plow Manufacturers, sub-classification of Agricultural Implements.
Presses, Various Kinds.
Radiator Manufacturers.
Rolling Mill Machinery.
Saw Mill Machinery.
Special Machinery.
Steel Structural Work.
Stove Manufacturers.
Textile Machinery.
Valve Manufacturers, Various Kinds.
Wheels, Various Kinds, and hundreds of other articles

For correlative trades not included under head of Machinists & Founders see:

Automobile Builders.
Boilers, Tubular, Etc.
Bolt & Nut & Rivet Manufacturers.
Chains, Various Kinds.
Cutlery Manufacturers.
Forgings, Various Kinds.
Furnace Manufacturers. Hot Air, Etc.
Gas & Electric Fixture Manufacturers.
Hardware Manufacturers.
Rolling Mills & Steel Manufacturers.
Saw Manufacturers.
Screw Manufacturers.
